What are the best ways to assess entrepreneurial competence?

ASSESSMENT AS LEARNING

Assessment as Learning is the use of ongoing self-assessment by students in order to monitor their own learning, which is “characterized by students reflecting on their own learning and making adjustments so that they achieve deeper understanding.” (Western and Northern Canadian Protocol for Collaboration in Education)

ASSESSMENT LITERACY

Assessment Literacy is defined as the knowledge about how to assess what students know and can do, interpret the results of these assessments, and apply these results to improve student learning and program effectiveness.”

ASSESSMENT ACROSS THE WORLD

Across the world schools, districts, states, countries, consortia, NGOs and international bodies are rethinking assessment.

There is a growing sense that most public examinations, especially in secondary education, don't examine the right things.

The wider capabilities and dispositions wanted by employers such as creativity and collaborative problem solving are largely absent.

Important aspects of the development of character, resilience and social and emotional learning are missing.

Important aspects of practical and applied learning are almost entirely overlooked.
